

#WE THE FUTURE
July 26th, 2023
1 pm to 5 pm
The Future of AI and the SDGs
(United Nations Headquarters, NYC)

Vision: Uniting the Elders and Youth to Transform Humanity with technological innovation at its core.

Mission: Uniting the world's most conscious leadership as a roundtable to deliberate our collective future through effective intergenerational communication and align with the future of AI and the UN's SDGs.

Executive Overview: Transforming humanity guided by a new north star to restore hope, faith and peace in our time by Leveraging Technological Innovation for Global Wellbeing and Impact.

We The Future envisions a world where human action is empowered by the future of technological innovation such as AI in solving for the 17 UN Sustainable Development Goals and our greatest global grand challenges here and now. We serve and inspire humanity in transforming our world for a better future with consciousness, leadership, and innovation at its core.

We The Future invites a small group of committed pioneers, experts and trailblazers in the fields of innovation, entertainment, design, media and business that will launch #WeTheFuture to Help Our Planet Every Day as a unique and extraordinary campaign and announce the official #WeTheFuture Summit in September.

GOAL 1: AI for Poverty

GOAL 2: AI for Zero Hunger

GOAL 3: AI for Good Health and Wellbeing

GOAL 4: AI for Quality Education

GOAL 5: AI for Gender Equality

GOAL 6: AI for Clean Water and Sanitation

GOAL 7: AI for Affordable and Clean Energy

GOAL 8: AI for Decent Work and Economic Growth

GOAL 9: AI for Industry, Innovation and Infrastructure

GOAL 10: AI for Reduced Inequality

GOAL 11: AI for Sustainable Cities and Communities

GOAL 12: AI for Responsible Consumption and Production

GOAL 13: AI for Climate Action

GOAL 14: AI for Life Below Water

GOAL 15: AI for Life on Land

GOAL 16: AI for Peace and Justice Strong Institutions

GOAL 17: AI for Partnerships to Achieve the Goals

Our goal is to use the potential of Artificial Intelligence and Wellbeing Tech to alleviate mental distress and improve health in urban environments to positively disrupt humanity and save the world. We actively seek to identify and unite the leadership necessary to solve for the 17 UN SDGs and do so in a way that provides tremendous value to the future of humanity and the planet.

The adoption of the 2030 Agenda for Sustainable Development saw world leaders commit to 17 comprehensive, integrated and ambitious Sustainable Development Goals (SDGs). The world in which the SDGs were adopted is very different now. These technological advances are also raising questions on its societal impact especially since the advent of Chat GPT and generative AI. But there is also a better future that

can manifest itself with the right kind of leadership, innovation, communication and consciousness.

The Event will be held on 26th of July 2023, at the UN Headquarters in New York as a round table discussion to highlight and showcase the work being done in the world by the most disruptive leaders across the planet.

Objectives: Create the world's first roundtable focused on leveraging AI as a force for good. Provide a platform for dialogue between the elders and youth representatives, while building a strong global and local network of pioneers to join forces in rallying commitments for the future.

**Co-Chairs, #WeTheFuture: The Future of AI and the SDGs
First-ever Round Table on the 26th of July 2023**

Kunal Sood, Founder #WeThePlanet and X-Impact Group, Impact Leadership Strategist and Social Entrepreneur

Poonacha Machaiah, CEO Chopra Foundation, Expert in Wellbeing, Technology and Social Entrepreneur
