

## **GORDON WINSTON**

*Co-Founder, Peace Innovation Initiative*

Gordon Winston is a distinguished leader in innovation, data security, renewable energy, precision medicine, and computational intelligence. He also serves as Chairman and CEO of Inventive Capital, Inc., and Founder and CEO of QSecGrid, Inc. Winston is renowned for his forward-thinking, human-centered approach to business, seamlessly integrating cutting-edge technology with impactful investment strategies that consider the broader dynamics of entire systems.

His career launched with a remarkable 14-year tenure on Wall Street, where he mastered corporate finance and investment strategy. This expertise led to his orchestration of a family office's take-private acquisition of Drug Royalty Corporation, Inc., which he transformed into DRI Capital. Under his visionary leadership, DRI Capital grew to manage over \$5 billion in assets, establishing itself as a global authority in partnerships and transactions with pharmaceutical, biotechnology, and medical device companies, as well as academic institutions and inventors worldwide.

In addition to his success with DRI Capital, Winston founded QSecGrid, Inc. and Q-Global Energy Management Systems (QGEMS), both of which are at the forefront of industry innovation. QGEMS, notably, has pioneered a modern energy "hypergrid" that supports the global transition to clean and alternative energy sources. This initiative exemplifies Winston's commitment to sustainability and his dedication to developing transformative business models.

Winston's vision extends beyond financial returns to encompass a broader, more inclusive definition of capital—one that fosters a sustainable and socially responsible economic ecosystem. His career highlights include leading DRI Capital to top-tier performance, founding Inventive Capital, and playing a pivotal role in supporting Intellectual Ventures. His unwavering commitment to social impact is evidenced by his alignment with the United Nations Sustainable Development Goals 2030.

Beyond his business achievements, Winston is deeply engaged in philanthropy and advocacy. As a member of the esteemed Harry Winston family, he actively participates in the World Presidents' Organization (WPO) and the Young Presidents' Organization (YPO). Together with his siblings and his mother, Barbara Winston, he advocates for peace innovation through collaborations with the United Nations and various NGOs and foundations. As a co-founder of the Peace Innovation Initiative and an Ambassador for the United Nations-mandated University for Peace, Winston is devoted to promoting a culture of peace through innovative and impactful solutions.

Gordon Winston's unique perspective, shaped by his extensive experience across diverse industries, has positioned him as a visionary leader dedicated to driving positive social change. He is also the proud father of two inspiring daughters, who continue to motivate him in both his professional and personal endeavors.
