

## **VANESSA FARSADAKI**

*Founder & CEO, Space Exploration Strategies*

Dr. Vanessa Farsadaki is a medical doctor, systems thinker, and global innovation strategist working at the intersection of science, technology, and societal resilience. She is the President and Managing Partner of Space Exploration Strategies, where she advises governments, institutions, and companies on complex, high-risk innovation ecosystems, particularly in health and emerging technologies.

With an academic background spanning medicine, biology, genetics, astrophysics, and global business leadership, her work focuses on how advanced innovation models can be applied to foster stability, cooperation, and long-term peace in volatile environments. She is a Fellow of the British Interplanetary Society, an international educator, and a frequent contributor to global conversations on risk, governance, and responsible technological progress.
